

# Hands-on Lab: Working with Databases in Cloudant

Estimated time needed: 30 minutes

## Objectives

After completing this lab you will be able to:

- Create a database through the Cloudant dashboard
- Insert documents into your database to populate it
- Query documents with specific criteria
- Modify documents by updating and deleting them

## Prerequisites

In order to complete this lab, you will need to create an instance of Cloudant on IBM Cloud. If you haven't yet created one, you can create one by referring to the [Create an Instance of IBM Cloudant](#) lab.

Note: While working on this lab, you may be prompted to login when ever your session expires. Use your credentials to authenticate. This may happen when you step out or leave your Cloudant session unattended.

## Exercise 1 - Launch Cloudant Dashboard

Step 1: Click on [cloud.ibm.com/resources](#).

Step 2: Click on the Databases chevron.

Step 3: Click on your instance of Cloudant.

► Click here for Hint

Step 4: Click on Launch Dashboard.

IBM Cloud

Capacity details

# Exercise 2 - Create Database

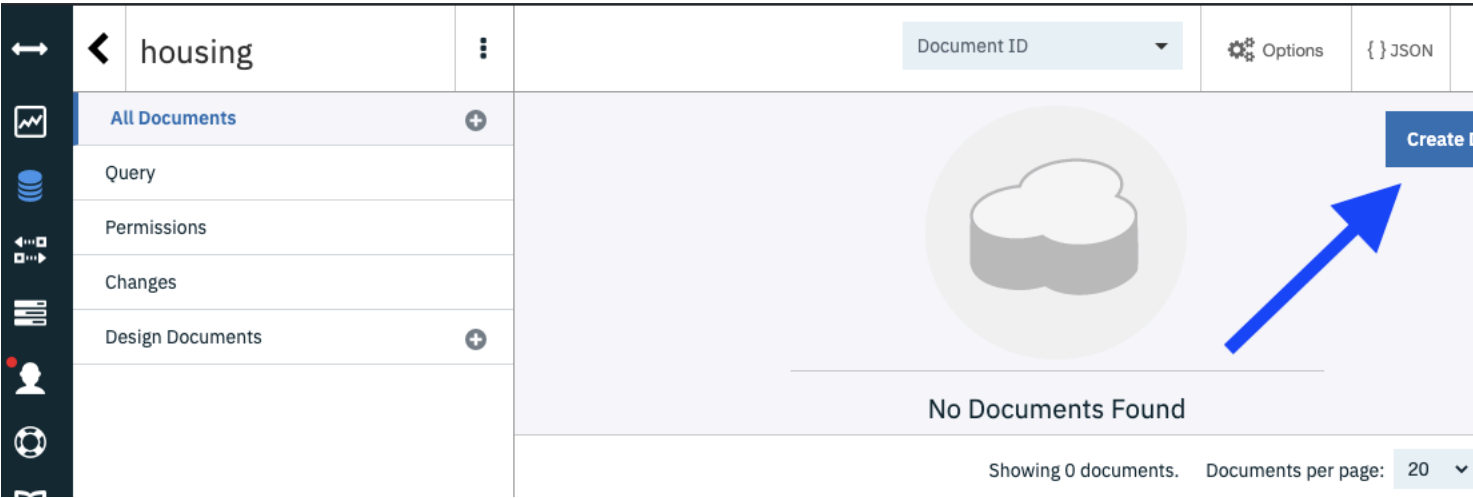

Step 1: On the dashboard click on Create Database.

Step 2: Type **housing** as database name. Select 'Non-partitioned' and click on Create.

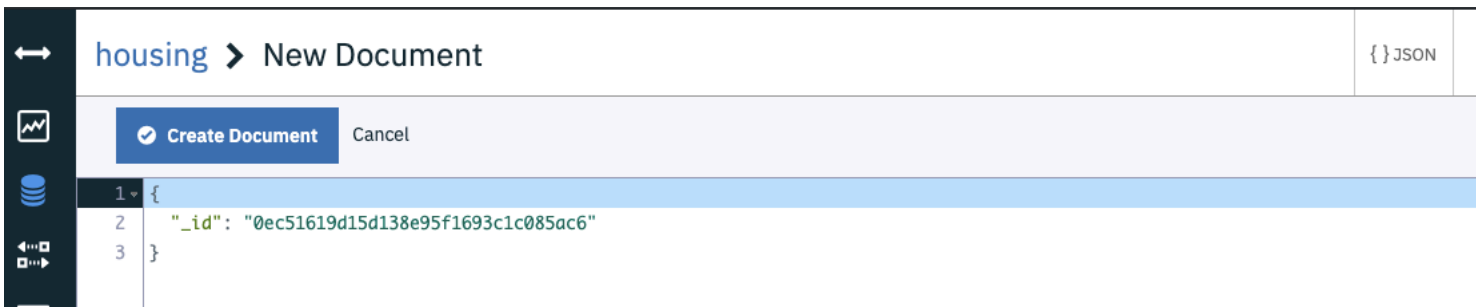

In a few moments the database will be created. and you will be taken to a page that looks like the one below.

# Exercise 3 - Insert documents

Step 1: Click on Create Document to insert a document.

You will be presented the below screen, with a simple sample document.

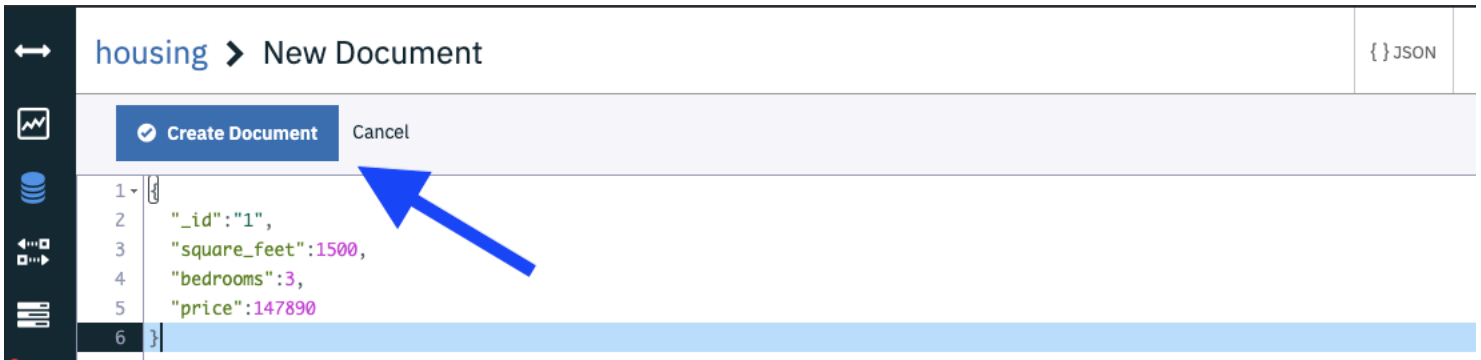

Cloudant uses `_id` key to uniquely identify a document. It is equivalent to the primary key in RDBMS. You can use your own custom values for `_id`.

Copy and paste the below json document and click on Create Document button, as show in the image below.

```
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7

1. {
2.   "id": "1",
3.   "square_feet": 1500,
4.   "bedrooms": 3,
5.   "price": 147890
6. }
7. }
```

Copied!

Once the document is created, Cloudant will take you to a page with the list of documents.

Click on the Table view button. You should see a screen similar to the one below.

Follow the above mentioned process and insert the below 4 documents. Ensure you only insert one document at a time.

```
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6

1. {
2.   "id": "2",
3.   "square_feet": 1800,
4.   "bedrooms": 3,
5.   "price": 182650
6. }
```

Copied!

```
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7

1.
2. {
3.   "_id": "3",
4.   "square_feet": 2000,
5.   "bedrooms": 3,
6.   "price": 201260
7. }
```

Copied!

```
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7

1.
2. {
3.   "_id": "4",
4.   "square_feet": 2200,
5.   "bedrooms": 4,
6.   "price": 234980
7. }
```

Copied!

```
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7

1.
2. {
3.   "_id": "5",
4.   "square_feet": 1100,
5.   "bedrooms": 2,
6.   "price": 114310
7. }
```

Copied!

After inserting the above documents your database should look like this.
